

Words worth *keeping.*

Wordsmith is an AI editorial system that proofreads, copy-edits, and developmentally edits long-form writing — paragraph by paragraph, never silently.

01 — INDEX

What's *inside*.

01	The product, in one breath

03	Brand principles
04	Voice & tone
05	Logo system
06	Fred — the editor at your shoulder
07	Color
08	Typography
09	The suggestion pattern
10	Do & don't
11	Sign-off

IN ONE BREATH

An editor that *shows its work*.

Wordsmith reads what you've written and offers paragraph-scoped, reviewable, reversible suggestions — proofreading, copy-edits, line edits, and developmental notes. Nothing changes unless you accept it. Everything is undoable.

Proofread

Catch typos, agreement, punctuation, and small mechanical errors. Surfaces issues, never silently rewrites.

Copy-edit

Tighten word choice, clarify ambiguity, smooth flow — without flattening your voice.

Line edit

Sentence-level shaping: rhythm, cadence, specificity. Treats prose like prose, not a string.

Develop

Higher-order notes on structure, argument, and chapter scaffolding for long-form work.

Fact-check

Flags claims that look load-bearing and asks where they come from. Confident only when warranted.

Polish

The final pass — surfaces only what would embarrass the writer in print. Quiet by default.

WHY WE EXIST

Help writers *finish*.

Most AI writing tools quietly replace your voice with their own. Wordsmith does the opposite. It treats the writer as the author and the AI as a careful, patient reader — one that catches what tired eyes miss, suggests what hurried prose forgets, and never moves a comma without permission.

“ The writer is the author. The AI is the editor. The page is the contract between them. ”

FOR WHOM

Novelists, essayists, memoirists, ghostwriters, founders writing in long form, and editors who use AI as a second pair of eyes — not a replacement.

AGAINST WHAT

One-click rewriters. Black-box "improve writing" buttons. Tools that lose your tracked changes, your voice, or your trust.

HOW WE BEHAVE

Four *non-negotiables*.

01 / Sovereignty

No silent edits.

Every change is proposed, never imposed. The document is unchanged until the writer says yes. This is the spine of the product, the brand, and the trust.

02 / Scope

One paragraph at a time.

Wordsmith works at the unit a writer thinks in. Not the whole document, not a single word — the paragraph. Small enough to review, large enough to mean something.

03 / Reversibility

Accept, reject, undo.

Acceptance is a single, deterministic transaction. Rejection leaves the page exactly as it was. Nothing Wordsmith does is one-way.

04 / Decoration

Highlights, not rewrites.

Suggestions render as overlays on top of the writer's text. Until accepted, the underlying document is untouched. The writer always sees their own words first.

HOW WE SOUND

Like a *good editor*, not a thesaurus.

Wordsmith sounds like a working editor at a small literary press: literate, direct, dry, and confident enough to be quiet. We don't hype. We don't apologize. We make the suggestion and step back.

Direct

not curt

YES

"This paragraph buries the verb. Try leading with what happens."

NO

"Fix verb."

Specific

not generic

YES

"The third clause repeats 'quiet' — we already have it in the second sentence."

NO

"Consider improving clarity and flow here."

Confident

not bossy

YES

"Cutting the second half tightens this without losing the image."

NO

"You should definitely cut this. It's much better."

Quiet

not bland

YES

"Comma here — the clause is parenthetical."

NO

"🌟🌟 Great work! Just a tiny suggestion to make this even better! 🌟🌟"

MARKS & LOCKUPS

A mark you can *fit in a margin*.

The Wordsmith mark is a small, dense glyph — designed to sit comfortably beside body type, in a favicon, or on the spine of a draft. The wordmark is its full-name counterpart, used in formal contexts and on covers.

PRIMARY MARK • ON
LIGHTPRIMARY MARK • ON
DARKON PAPER / WARM
NEUTRAL

WORDMARK • PRIMARY LOCKUP

WORDMARK • REVERSED

CLEAR SPACE

Maintain clear space equal to the cap-height of the wordmark on all sides. Never crowd the mark with body type, badges, or interface chrome.

MINIMUM SIZE

Mark: 16 px / 4 mm.

Wordmark: 80 px / 20 mm.

Below these sizes, switch to the mark alone.

THE EDITOR AT YOUR SHOULDER

Meet *Fred*.

Fred

DEVELOPMENTAL EDITOR · IN RESIDENCE

Fred is the senior voice in the room. He reads the whole manuscript, asks the questions a structural editor would ask, and points at the chapter that isn't pulling its weight. Where the rest of Wordsmith works sentence-by-sentence, Fred zooms out.

PERSONALITY

Patient. Literate. Mildly judgmental in the way good editors are. Never sycophantic. Never breathless. Reads twice before speaking.

WHEN TO INVOKE

For chapter-level QA, structural notes, voice consistency, and developmental feedback. Not for typos — that's a different pass, and a different tone.

PALETTE

Ink, paper, *and a single green.*

The palette is built around two surfaces — a near-black ink and a near-white paper — anchored by one functional accent: the suggestion green. Color does work; it doesn't decorate.

CORE

 Ink #0B0F17 DARK SURFACE • PRIMARY TEXT ON LIGHT	 Paper #FFFFFF LIGHT SURFACE • THE PAGE	 Text #0D1320 FOREGROUND ON LIGHT	 Type-reversed #E8EDF6 FOREGROUND ON DARK
---	---	--	---

FUNCTIONAL

 Suggestion • light #E8F5E9 ACCEPTED-TEXT BACKGROUND	 Suggestion • dark #173B2E ACCEPTED-TEXT BG, DARK MODE	 Strike #999999 OLD TEXT • ABOUT-TO-BE- REPLACED	 Paper • warm #F5EFE6 EDITORIAL SURFACES • PRINT REFS
---	---	--	--

USAGE RULES

Ink & paper carry the brand. Reach for accent color only when it does functional work — suggestion state, focus, error.

One green, not many. Every accept-state in the product uses the same green. Don't introduce yellows or blues to mean similar things.

TYPE SYSTEM

A serif for the *page*, a sans for the *app*.

Aa Bb

DISPLAY / EDITORIAL

Iowan Old Style → Hoefler Text →
Garamond → Georgia

USE FOR

Headlines, manuscript body, pull quotes, editorial
surfaces, marketing.

Aa Bb

UI / INTERFACE

System sans · ui-sans-serif → SF Pro →
Segoe UI → Roboto

USE FOR

Buttons, menus, side panels, settings, anything
chrome — never inside the manuscript.

{ aa }

OUR SIGNATURE INTERACTION

The diff is the *brand*.

Strike-through old, green new. Two buttons. One paragraph. The Wordsmith suggestion is the most-recognized expression of the brand — keep it consistent across web, mobile, print, and marketing.

ANATOMY

Old text is dimmed and struck through. New text sits in suggestion-green with full contrast. Both are visible simultaneously — never one or the other.

AFFORDANCES

Accept (primary), reject (secondary), explain (tertiary). In that order, always. No icon-only buttons inside the suggestion frame.

PRACTICAL RULES

Quick *reference.*

Do

- + Treat the writer's text as the source of truth, always.
- + Show the diff. Strike-through old, green new.
- + Scope every suggestion to a single paragraph.
- + Use the serif for manuscript and editorial surfaces.
- + Use the sans for interface chrome only.
- + Let Fred carry the developmental, structural voice.
- + Make every action reversible.
- + Stay quiet by default; speak when it matters.

Don't

- Apply edits silently or without explicit accept.
- Rewrite a whole document in one pass.
- Mix serif body type with the app's UI sans.
- Use suggestion-green for anything other than accept-state.
- Stack emoji, exclamation marks, or "✨ improvements ✨".
- Recolor or restyle Fred. He has one face.
- Translate the mark. Wordsmith is a wordmark, not a graphic.
- Replace the writer's voice. Sharpen it.

SIGN-OFF

A book is a
conversation
between a
writer
and a careful
reader.

Wordsmith is what happens when that reader is patient, literate,
and available at 2 a.m. — and still knows when to keep quiet.
